Show Details

Thanks for the call [REDACTED]

[REDACTED] is the Lead Tower Operator for Bell Helicopter and he can ensure the pilots at the Bell Hurst, Arlington and Alliance facilities are aware when the Arlington Police UAS Operations are active.

Please give me the area of operations, the limitations of the UAS activities in AGL altitude and time and a contact number for the Arlington Police unit involved.

Please advise Robert and I when the area is going active.

If you could also send me the Super Bowl TFR data that would be helpful as well.

Thanks again.

Chief Pilot

Bell Helicopter
